EW A3 Double Depth
CE1958_ _* – 469 x 425 x 157mm

GLIDE & TILT ®

Structural Runner

Panel Runner

A pioneering design, the **Glide & Tilt®** Tray Runner System with integrated "Arrestor & Tilt" feature holds the tray in an angled open position making easy access and clear display of the tray contents. The **Glide & Tilt®** Runner holds the tray and stops it from falling out of the unit and yet a simple manoeuvre allows easy removal if required.

There are 2 types of runner. The **Glide & Tilt®** Structural Runner, available as a Triple or Single module, has been designed as a structural element for use with metal frames.

The Glide & Tilt® Panel Runner is used within carcase units and has been designed to replace existing MDF or wood runners. There is no need to change carcase dimensions as these runners are a direct replacement.

Either of the runners offers complete flexibility, there is no limit to the combination of trays that can be used within any storage unit. Both types are moulded from "Super Tuff" ABS for strength and durability and designed to suit both Standard Width (SW) 312mm wide trays and the Extra Wide (EW) A3 469mm width tray in all depths.

For more information and technical data please call **0044 (0)1582 456 955**

The Certwood **Glide & Tilt®** Tray Runner system is protected by the following Patents and Design Applications:

Community Design 000659230, 001744624-0001 & 001744624-0002, US Design Patent D600948, Canadian Design Application 121660, UK Patent 2442935, US Patent Application 11/874793, Canadian Patent Application 2605509

Wooden 'StorSystem' Storage
SW – Standard Width Trays

All units (except midi and maxi units) incorporate the unique **Glide & Tilt**® Tray Runner System allowing the trays to stop in an angled open position without falling out of the unit making for easy access and viewing. Yet a simple manoeuvre easily removes the tray from the units.

- Constructed from high performance Pearwood finish melamine-faced chipboard 'MFC' and edged with high impact resistance PVC edging.

- Incorporating the patented **Glide & Tilt**® Tray Runner System.

- Manufactured to BS:5873 part 4 for strength and stability.

- Housing the standard Width SW 312mm wide Storage Trays.

- Midi & Maxi box storage unit trays sit on shelves.

- Supplied mobile with fitted castors (except for 36 tray unit which is fitted with feet).

- Choice of tray sizes and colour combination.

- Designed for continuous work surface option when units of similar height are located together.

Note: Dimensions shown are overall size

DesignaRak™
Create your own StorSystem

The range consists of tray units, open shelf units and wide drawer units. Any units of the same width can be stacked and the storage elements within the units can be tailored to suit specific needs.

Tray units can be specified with any combination of tray depth and colours. The SW range is available in 3 different depths and the EW range in 2 depths, see pages 02/03. Single width shelves can replace trays in any of the SW tray units. The open shelf units types T and U have 2 adjustable shelves but additional shelves can be added if required.
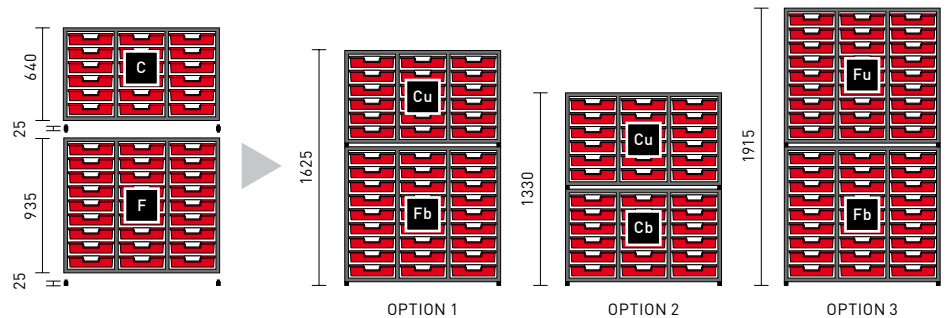

How to specify your BuiltUp Storage

1. Choose a unit from the SW or EW range below for the base unit. For example – unit F would become unit Fb as shown in the diagram. Adding a b to the unit code identifies it as a base unit, supplied with adjustable feet.

2. Choose a second unit of the same width to stack on top of your base unit. For example – unit C would become unit Cu as shown in the diagram. Adding a u to the unit code identifies it as an upper unit, supplied with frame connectors.

3. Choose your combination of tray types and or shelves to suit your requirements. Each tray position takes a Single Depth Tray, the Double Depth Tray takes 2 Single Tray positions and the Quad Tray takes 4 Single Tray positions.
    As shown in the diagram, 3 different heights of BuiltUp units can be specified from the 2 units shown, each housing different numbers of tray positions. It is recommended that the maximum height of a BuiltUp unit is 1910 mm (option 3 plus feet) as shown in the diagram and they are fixed back to back or to the wall.

   All the Metal units throughout the catalogue are compatible and incorporate the **Glide & Tilt®** System.

RollaTray™

- Store, Stack and Roll.

- Practical storage for everything that needs a home.

- Roll it where you need it.

- Ideal for the Classroom, Storeroom, Teacher and Pupil.

- Stores all your resources and looks good too.

- Available in 4 primary colours and clear.

- Each RollaTray consists of 5 Storage trays.

- 3 different sizes – one Quad, one Double and three Single.

- Each tray includes a different pair of StorTray inserts
  (5 versions – 2 per tray) and a tray lid.

- The larger trays allow space below the inserts to store other items.

- The bottom Quad tray is fitted with rubber tyre wheels.
