Upper Canada College

Ontario, Canada

Upper Canadian College is one of North America's foremost boys' school for over 1100 students from Senior Kindergarten to Grade 12. UCC operates under the International Baccalaureate program and is recognized by educational institutions around the world for excellence.

The PantoMove

The PantoMove chair is one of the most ergonomic swivel chairs on the market. Designed by Verner Panton, the chair was made to follow the movement needs of the body, with a focus on the anatomically shaped seat shell. The double-walled perforated polypropylene seat offers a pleasant air cushion effect and thus supports the back. The most outstanding feature is certainly the 3-D rocking mechanism, allowing movement backwards, forward and to the sides. The PantoMove chair is height adjustable and available with or without casters.

Rondo-Lift-KF Sit at and Stand-at table

The concept of standing at a desk and working is gathering popularity. Prolonged sitting and the general reduction of movement in children today is an increasing health problem and carries negative long-term effects on health. Standing promotes complex micro-movements which we know supports mental alertness. Standing also subjects the discs in the spine to less load as compared to sitting and promotes blood and oxygen flow. Research also shows that we burn up to 350 more calories a day when we use a stand at desk throughout the day. The Rondo-Lift has a gas-filled mechanism with height adjustment from 27 1/8 - 44 1/2" and is easily activated by a hand switch. The table is also on lockable casters so it can be easily moved from space to space.
